

26th WiN

Women in Nuclear

WIN is an international non-for-profit association of women working professionally in various fields of nuclear energy and radiation applications. It is dedicated to the development of dialogue with the general public for awareness and promotion of nuclear technology, the exchange of knowledge and the promotion of nuclear-related engineering and science professions among women and young people. WiN Global has more than 30 national, regional and international chapters and approximately 25000 members.

13 Technical Tracks:

- NPPs Operation, Maintenance and Design Modification.
- Advanced Nuclear Systems.
- Neutronics, Reactor Physics and Core Criticality.
- Thermal Hydraulics.
- Nuclear Fuel Science.
- Materials for Nuclear Industry.
- Nuclear Safety, Security and Radiation Protection.
- Nuclear Fuel Cycle, Waste Management and Decommissioning.
- Fusion Energy.
- Human Resources, Communication and Knowledge Management.
- Nuclear Policy, Economics and Social Aspects.
- YGN Best Practices.
- Nuclear Technology in Medicine, Biology and Non-power Sectors.

IYNC WIN 2018

**Challenge the present,
empower the future**

IYNC & WiN Global
Joint Conference
11- 17 March 2018
Bariloche
Argentina

International Youth Nuclear Congress

IYNC is a global network for young professionals in the nuclear field, dedicated to promoting peaceful uses of nuclear technology, providing a platform for professional networking, and transferring knowledge from current to next generational nuclear leaders. It has successfully held 8 international conferences around the world in Slovakia (2000), South Korea (2002), Canada (2004), Sweden/Finland (2006), Switzerland (2008), South Africa (2010), USA (2012), Spain (2014) and China (2016). The latest conference in China hosted 354 participants from 34 countries and was executed with the help from over 70 volunteers from around the world.

Featured national and international speakers from:

IAEA - CNNC - CNEA
INVAP - AREVA
ROSATOM

Technical Visit
Atucha Nuclear Power Plant
Bariloche Atomic Centre
INVAP
Angra Nuclear Power Plant
Huemul's Island
