CERAD
CENTRE FOR ENVIRONMENTAL RADIOACTIVITY

ANNOUNCEMENT

Registration for international fieldcourse on

«Experimental Radioecology and Radiobiology»

Aim: - to obtain practical skills of working in radiation contaminated territories like Chernobyl exclusion zone (ChEZ), through solving actual problems in radiation ecology.

Structure: During the course participants are expected to work on the following problems:

- 1) Forest fires in ChEZ: risk and consequences estimation, developing recommendations for prevention.
- 2) Nuclear power plant cooling pond drainage: estimation on the influence on environment, providing recommendations for further implementation.

Participants are expected to choose problems (either (1) or (2)), and to contribute to a group report on one of the topics, that will be given in the a further synopsis.

Credits: you will be able to get **5 credit points** from this course.

Location and time frame: overall course duration - June 18 – 28 2017, including:

June 18 – 20: lectures in UIAR labs, preparation for a field trip;

June 21 – 24: fieldtrip to Chernobyl exclusion zone, working on the chosen research topic;

June 24 – 28: lectures in UIAR labs, preparation of a course report.

Participation requirements:

- Master students, PhD students;
- Be interested in studying of environmental problems of nuclear power and overcome the consequences of Chernobyl and Fukushima nuclear power plants disasters;
- Participants are asked to bring their laptops;
- Travel and accommodation for NUBiP and NMBU students will be covered by CPEA-2015/10108 project.

Registration: In order to apply for the course, please fill in the attached form:

Olena Pareniuk, NUBiP, olena.parenjuk@gmail.com – UIAR course coordinator

Valery Kashparov, UIAR, vak@uiar.org.ua – director of the UIAR

Ole Christian Lind, NMBU, olelin@nmbu.no – NMBU course coordinator

Looking forward to meeting you in Kiev!
