

G.M. Panov. Distribution and number of the White-tailed Eagle in the Chernobyl exclusion zone. //Berkut. – 2004 -13 (2).- P.226-229.

The results of observations during 1987-1995 are presented. The areas of the White-tailed Eagles permanent distribution are described, the nesting localities are denoted. Number of the species in the Chernobyl zone is estimated at least in 8 breeding pairs. It is supposed that the Chernobyl zone is one of the largest reserves of the White-tailed Eagle conservation in Ukraine.
