

Dunin V.F., Piskunov V.S., Pareiko O.A., Kireenko K.M. The state of populations of wild animals in the Polesie State Radiation and Ecological Reserve // Belovezhskaya Pushcha at the turn of the third millennium. Materials of the scientific-practical conference dedicated to the 60th anniversary of the formation of the State Reserve "Belovezhskaya Pushcha" (December 22-24, 1999, Kamenyuki village, Brest region). – P. 286-288.

Studies of the state of populations of wild animals in PGREZ have been conducted since 1996. Aerovisual surveys of abundance and biotopic distribution and winter route surveys of wild animals were carried out, and also spring counts of badger, fox and raccoon dog in burrows, beaver in dwelling huts and burrows, muskrat in forage tables.
