

Malenok L.V., Shamro A.V., Turchin L.M. Current status and distribution in the territory of PSRER of rare and endangered plants and mushrooms listed in the Red Book of the Republic of Belarus // Ecosystems and radiation: aspects of existence and development. Coll. scientific paper. dedicated to the 25th anniversary of the Polessky State Radiation Ecological Reserve / Under the total. ed. Yu.I. Bondar. Minsk: BORBITS RNIUP "Institute of Radiology", 2013. - P. 184-196.

The results of the analysis and generalization of information concerning the distribution and location of vascular plants and fungi listed in the Red Book of the Republic of Belarus, growing on the territory of the Polessky State Radiation and Ecological Reserve are presented. The representativeness of the protected flora of the reserve relative to the total number of species of vascular plants and fungi protected in Belarus is determined. The role of the reserve in conservation of biodiversity of the flora of the Belarusian Polesye is shown.
