

Sakhvon V.V. Role of the flood-plain forests of the Landscape Reserve Middle Pripyat in saving of rare and unnumerous bird species// Nature Reserve in Ukraine.- 2009.-Vol. 15. - P. 67-70.

Data on the distribution of rare and unnumerous bird species in the floodplain forests of the reserve were obtained in 1999-2009 at two sites. 17 bird species nesting in the floodplain forests of the reserve are included in the latest edition of the Red Book of the Republic of Belarus. For the conservation of some of these species, floodplain forests play a key role.
