

Biological diversity of the Pripyatsky National Park and other specially protected natural areas / A. V. Uglyanets //Collection of scientific works of the Pripyatsky National Park. - Turov-Mozyr: "White Wind", 1999. - 360 p.

The collection of scientific papers is dedicated to the 30th anniversary of the formation of the main specially protected natural area of the Belarusian Polesie - the Pripyatsky National Park. The history of the creation of the Pripyat reserve, its reorganization into a national park is described.

Most of the scientific works are devoted to the biological diversity of the territory of the Pripyatsky National Park. A number of works concern the climate, geology, geochemistry, hydrology and soils of the park.

The great role of the Pripyatsky National Park in the preservation and study of the natural complexes of Polesie is noted.
